

Nvolve™ Offer FREE iPad 2 for all New Accounts

Nvolve Ltd has helped many organisations in the Pharmaceutical / Medical Devices Industry meet their regulatory requirements when it comes to the management, tracking and reporting of compliance training for their standard operating procedures.

Nvolve have recently launched a new product called Procedure Manager™ which allows highly regulated companies to completely remove Microsoft Excel from their compliance training process.

To mark the launch of Procedure Manager™ Nvolve are offering a FREE iPad 2 to the first 50 new users set up in the month of May.

Companies that are using Procedure Manager™ right now were originally using Excel Spreadsheets to manage, track and monitor all aspects of procedures, job roles etc. They found that the Excel approach is simply a “tick box” exercise which can become very time consuming and is not very useful for any sort of reporting, especially when new procedures are added and existing ones are updated. Procedure Manager™ allows clients now to move away from Excel completely and has many built in real time reporting options such as dashboards and on screen views.

Procedure Manager™ can not only save you time, effort and money but if you are one of the first 50 users signed up you will receive a FREE iPad 2. You can start using Procedure Manager from as little as €99 / £89 per month and you can get set up in less than 2 days.

If you would like to take up this offer you can e-mail Annemarie Doohan at adoohan@nvolve.net or tel +353 (0)74 91 16000.
